Sanpellegrino S.p.A Statement on Compliance with the EU Packaging and Packaging Waste Regulation (PPWR).

Sanpellegrino S.p.A welcomes the objectives of the EU Packaging and Packaging Waste Regulation (EU) 2025/40. Its focus on packaging circularity and waste reduction aligns directly with Sanpellegrino S.p.A's long-standing packaging sustainability strategy. Sanpellegrino S.p.A is fully committed to and working on meeting all applicable PPWR requirements within the legal timelines. Ensuring compliance across our packaging portfolio is a top priority.

We are taking concrete steps to prepare, including:

- Assessing all packaging formats against PPWR obligations, with a particular focus on ensuring compliance with Article 5.
- Engaging closely with our packaging suppliers on their compliance readiness.

We acknowledge that certain criteria and measures of the PPWR—including secondary legislation and technical guidelines—are still under development. We actively monitor these evolving requirements and will adapt our processes and documentation as needed to ensure continued compliance once all details are finalized.

EU Declarations of Conformity (EU DoC)

For PPWR sustainability requirements applicable from **12 August 2026** (including PFAS for food contact packaging and heavy metals for all packaging), the Sanpellegrino S.p.A legal entity acting as PPWR manufacturer will complete the conformity assessment, draw up technical documentation and **EU Declaration of Conformity before the applicable date** for the requirements in question. Furthermore, we want to clarify that these documents form part of Sanpellegrino's internal compliance framework and, as per art. 15(10) PPWR, shall be made available to competent national authorities upon their request.

Sanpellegrino S.p.A.
